

Belle River Wind Project Community Liaison Committee

The Belle River Wind Project (Project) is a 100 megawatt commercial wind energy generation facility to be located in the Town of Lakeshore, Essex County, Ontario. The Project is being developed by SP Belle River Wind LP, by its general partner, SP Belle River Wind GP Inc. (Belle River Wind), which obtained approval from the Ministry of the Environment and Climate Change (MOECC) to build a Class 4 Wind facility in January 2016. For this project Belle River Wind is establishing a Community Liaison Committee (CLC) to act as an advisory body and discuss various aspects including construction, installation, use, operation, maintenance and retirement of the Project.

CLC meetings will serve as a forum to share ideas, express concerns and to provide the community with ongoing updates about the Project. An independent facilitator from AECOM has been retained to establish, coordinate and facilitate the CLC.

Join the Discussion

The CLC for this Project is expected to consist of up to 14 people representing a cross-section of the community with the aim of providing a broad and balanced perspective. CLC members will be encouraged to share any information and the results of all CLC discussions with other interested community members.

Individuals from the following groups are invited to participate:

- Landowners;
- Residents within 1 km of the Project;
- Aboriginal and First Nations communities;
- Members of the agriculture community;
- Business / industry representatives;
- Local social and environmental organizations; and,
- Representatives from local government agencies.

Each CLC meeting will be open to the public so that the community can participate by observing. Requests for delegations are welcomed and can be made prior to each meeting to the CLC facilitator.

The Belle River Wind CLC is expected to meet at least four times over a two year period, with two meetings each year. We anticipate hosting the 1st CLC meeting in late April 2016.

To join the committee, please contact Mark van der Woerd of AECOM by April 8, 2016 so that he can speak with you about your interest and confirm next steps.
